

A Little About Mrs. Boatman:

I pretty much grew up in the classroom, as my mother was an elementary art teacher for thirty-three years. I am passionate about children and love seeing the world through their eyes.

I hold a Bachelor of Science degree in Psychology from Colorado State University, as well as a Master's degree in Elementary Education from the University of Phoenix. The 2011 - 2012 school year will be my sixth year of teaching at Carbon Valley Academy.

My husband and I live in the community along with our daughter, Brooke, our son, Benjamin, and our yellow lab, Hayden.
